

**Dear colleagues and students,**

***OKP 2 (TEACHING IN ENGLISH)***

Since exercises are now half an hour long, four-hour stay at the OKP1 clinic five times during the semester or five-hour stay three times during the semester will be considered as held exercises. Assistants must keep students' cards and regularly register their time spent on exercises. At the end of the last exercise, it must be recorded in indexes that teaching is completed in the following way: lectures 0, exercises 40, other 0. A notice regarding the manner of taking the mid-term exam will be issued subsequently. It will most likely be in the form of a test at end of this semester.

It is of high importance for students to wear white pants and T-shirts, obligatory shoes, surgical masks and caps, while visors are provided by the Faculty (that is the decision of Dean's collegium). Students must be provided with changing room. The work in civilian clothes **MUST NOT BE ALLOWED**, both for patients and students' safety. After the exercise, students must pack their uniforms and wash them before the next exercise. This is the only way to prevent spreading of COVID-19 infection in hospitals and among the students.

The situation is extraordinary and I ask you all for patience and understanding. Visits in hospitals are still forbidden, therefore it is suggested that there are no more than three students at the same time in departments with a maximum of twenty beds.
