

UNIVERSITY OF BELGRADE
FACULTY OF MEDICINE
PhD STUDIES

NAME OF THE MODULE: Gynecology and gynecological oncology

CONTENT OF THE PROGRAM:

The module introduces students to data and information sources in a clinical setting and to the process of generation of new knowledge through research methodology in clinical practice. Mastering research methodology in the field of gynecology, gynecological oncology, oncology, infertility, genital infections, pathology of the lower genital tract and complementary areas of diagnostics and therapy (imaging, radiation oncology, medicinal oncology and innovative oncological therapy) students will develop critical approach to doctrines and innovations in these disciplines. Students are projected to learn to critically analyze different types of publications in the field of studies and to put the new knowledge in the correct context.

ENROLLMENT REQUIREMENTS:

Completed integrated academic studies in medical sciences in duration of six years (360 ESPB) and a proven interest for scientific and research work in the fields of gynecology, gynecological oncology and oncofertility.

ADVISORY BOARD:

1. Prof. Aleksandar Stefanović
2. Prof. Saša Kadija
3. Prof. Vladimir Pažin
4. Prof. Snežana Vidaković
5. Prof. Katarina Stefanović

LIST OF OBLIGATORY SUBJECTS:

1. Gynecological oncology
2. Gynecology
3. Oncofertility

LIST OF ELECTIVE SUBJECTS:

1. Infertility
2. Imaging in gynecology and gynecological oncology
3. Clinical research in emergency conditions in gynecology
4. Benign and premalignant conditions of lower genital tract

5. Pelvic inflammatory diseases and sexually transmitted diseases
6. Basic principles of radiation therapy, chemotherapy and innovative therapy in gynecological oncology
