Demonstratura, Academic School Year 2019-2020:

In collaboration with Anatomy, Histology and Embryology Institutes and Departments, and the support of the Management Board of English Studies

Demonstratura is the volunteer activity in a pre-clinical practical lecture. Demonstratura is organized by course directors with the direction and support of the Management Board of the English Studies.

During the Academic School Year 2019-2020, the Student Board delegate a member to help with the organization of these activity. Thanks to the excellent collaboration of all Institutions, almost 40 people applied through the SB. 10 students satisfied the requirements and were allowed to be demonstratori.

Public Lecture "Covid-19" February and March 2020:

In collaboration with Epidemiology, Infectious Diseases and Virology departments of the MFUB and WHO office in Serbia

Due to the introduction of the State of Emergency, the public lecture was cancelled.

However, we remark that in a time of great uncertainty, the SB took charge to organize an informative event over what now is the greatest pandemic in the last 100 years.

Even more, the Covid-19 Public Lecture is still the First and only similar event organized by the SB in a record time of 2 weeks. Fundamental for the organization of this event was the availability of the prestigious professors of our Faculty.

Instagram profile, Spring 2020:

In order to stay closer to our colleaues, we decided to create a SB Instagram Profile.

The importance of this profile was great during the State of Emergency as all official MFUB and none infos were promptly share among all generations.

Furthermore, forecasting the potential, the Instagram Profile could help students to prepare their practicals by Instagram “quizzes” as well as sharing interesting facts over the MFUB and the city of BG.
